

State-of-the-art metal powder technology

Carbonyl Nickel Powder

Ni Type: FNP-300

FNP-300 is an extra-fine filamentary Ni powder produced using CVMR's proprietary carbonyl technology.

Applications:

- Conductive additive for rechargeable batteries, polymers and paints
- High surface area porous metal electrodes and filters
- Binder for Diamond and Hard Metal Tools

[Physical Properties]

Fisher Sub-Sieve Size	0,5 – 1.0 µm
Bulk Density	<0.45 g/cm ³

[Chemical Composition]

	REPRESENTATIVE WT%	MAXIMUM WT%
Carbon	0.6	1.0
Sulfur	0.0005	0.001
Oxygen	0.8	1.0
Iron	0.007	0.01
Other Elements	<0.001	–
Nickel	Balance	–

[Packaging]

CONTAINER VOLUME	PRODUCT WEIGHT (KG)
20 litre (5 gal.)	5
90 litre (20 gal.)	25
